Past activities of investment vehicles managed or sponsored by Blackstone provide no assurance of future success and **their past performance does not predict future returns**. Accordingly, there can be no assurance that the investment performance of BXPE will be comparable to the investments set forth herein or that BXPE will be able to implement its acquisition strategy or achieve its investment objectives. There is no assurance that BXPE will access all these strategies and available strategies may change from time to time. Such performance is hypothetical, provided for informational and illustrative purposes only, and does not represent the actual or estimated performance of BXPE or any other single fund, client or investor. Hypothetical performance has inherent limitations and prospective investors should not rely on any hypothetical performance shown herein. Additionally, the blended PE Platform net IRR shown is calculated using returns of drawdown funds and is not representative of returns that may be experienced by prospective investors in BXPE. Aggregated returns presented herein are hypothetical in nature, because no single fund exists that provides access to all underlying fund investments. Further, aggregated returns have inherent risks and limitations.

Note: As of September 30, 2024, unless otherwise noted. See "Summary of Risk Factors" and "Important Disclosure Information" including "Aggregated Returns," "Blended Private Equity Platform Net IRR," and "Performance Calculation" contained at the end of this material.

(i) The Blended PE Platform ("PE Platform") represents certain commingled funds, separately managed accounts and co-investment vehicles across Blackstone's Corporate Private Equity, Growth, Tactical Opportunities, Strategic Partners ("SP"), and Life Sciences strategies. Excludes Infrastructure, SP Infrastructure and SP Real Estate which are reported under Blackstone's private equity business but are not one of the key underlying strategies considered for BXPE as of the date of these materials and are therefore excluded. These particular strategies were chosen as they are the primary strategies that BXPE is expected to invest in or alongside. Performance of certain other Blackstone private equity strategies have been excluded from this calculation and that, if included, may have caused the Blended PE Platform Net IRR to be lower. Performance information presented includes information from a number of different Blackstone funds whose overall strategy and terms (including fees and expenses) vary significantly from each other and, potentially, from those of BXPE. The investments were not managed as a single portfolio with coordinated guidelines, objectives and restrictions, and did not involve the same Blackstone professionals who will be involved in the management and operations of any future BXPE investments.

(ii) Net Internal Rate of Return ("IRR") as of December 31, 2023 for Blackstone's Corporate Private Equity, Growth, Tactical Opportunities, Life Sciences, and Strategic Partners.

(iii) Net IRR, from inception in October 1987 through September 30, 2024 (with the exception of Strategic Partners which is as of June 30, 2024). The Blended PE Platform Net IRR was calculated by blending the aggregated net cash flows and unrealized values of the selected funds. IRR on total invested capital based on realized proceeds and unrealized value, as applicable, after management fees, expenses, taxes, servicing fees (if applicable), and Performance Revenues. IRRs are calculated using actual timing of limited partner cash flows. Initial inception date cash flow may differ from the Investment Period Beginning Date. Further, there may be differences in certain inputs used in the IRR calculations for each Blackstone business unit. The performance shown above reflects that of direct investors and is net of management fees, carried interest, and other fees and expenses. The performance does not account for any additional fees or expenses charged by a third party if the investor is participating through a feeder vehicle. The returns of such third-party feeder fund will be lower, possibly materially, than the returns illustrated above and that which may be achieved by a fund.

# Key Risk Factors

## Risk Indicator

**Under the Packaged Retail and Insurance-based Investment Products (PRIIPs) Regulation, we have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions could impact our capacity to pay you. There is no specific recommended holding period for the product. The actual risk can vary significantly, and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts how much you get back. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. Complete information on the risks of investing in BXPE are set out in the Prospectus.**

BXPE is an investment program designed to offer eligible individual investors access to Blackstone's private equity platform (the "PE Platform"). BXPE will seek to meet its investment objectives by investing primarily in privately negotiated, equity-oriented investments leveraging the talent and investment capabilities of Blackstone's PE Platform to create an attractive portfolio of alternative investments diversified across geographies and sectors. Investing in our Shares involves a high degree of risk. If we are unable to effectively manage the impact of these risks, we may not meet our investment objectives and, therefore, you should purchase our Shares only if you can afford a complete loss of your investment. You should carefully review the Prospectus for a description of the risks associated with an investment in BXPE. These risks include, but are not limited to, the following:

- Although the investment professionals of Blackstone have extensive investment experience generally, including extensive experience operating and investing for the PE Platform, BXPE has not commenced operations and has no operating history. We cannot provide assurance that Blackstone will be able to successfully implement BXPE's investment strategy, or that investments made by BXPE will generate expected returns.
- This is a "blind pool" offering which means that we have not yet acquired any investments, and thus you will not have the opportunity to evaluate our future investments before we make them.
- We do not intend to list our Shares on any securities exchange, and we do not expect a secondary market in our Shares to develop. In addition, there are limits on the ownership and transferability of our Shares. As such, BXPE can be described as illiquid in nature.

Further, the valuation of BXPE's investments will be difficult, may be based on imperfect information and is subject to inherent uncertainties, and the resulting values may differ from values that would have been determined had a ready market existed for such investments, from values placed on such investments by other investors and from prices at which such investments may ultimately be sold.

- We have implemented a periodic redemption program, but there is no guarantee we will be able to make such redemptions and if we do only a limited number of Shares will be eligible for redemption and redemptions will be subject to available liquidity and other significant restrictions. This means that BXPE will be more illiquid than other investment products or portfolios.
- An investment in our Shares is not suitable for you if you need ready access to the money you invest.
- The purchase and redemption price for our Shares will be based on our net asset value ("NAV") and are not based on any public trading market. While there will be independent valuations of our direct investments from time to time, the valuation of private equity investments is inherently subjective, and our NAV may not accurately reflect the actual price at which our investments could be liquidated on any given day.
- The acquisition of our investments may be financed in substantial part by borrowing, which increases our exposure to loss. The use of leverage involves a high degree of financial risk and will increase the exposure of the investments to adverse economic factors.
- The private equity industry generally, and BXPE's investment activities in particular, are affected by general economic and market conditions, such as interest rates, availability and spreads of credit, credit defaults, inflation rates, economic uncertainty, changes in tax, currency control and other applicable laws and regulations, trade barriers, technological developments and national and international political, environmental and socioeconomic circumstances. Identifying, closing and realizing attractive private equity investments that fall within BXPE's investment mandate is highly competitive and involves a high degree of uncertainty.
- BXPE's investments may be concentrated at any time in a limited number of industries, geographies or investments, and, as a consequence, may be more substantially affected by the unfavorable performance of even a single investment as compared to a more diversified portfolio. In any event, diversification is not a guarantee of either a return or protection against loss in declining markets. There is no assurance that BXPE will perform well or even return capital; if certain investments perform unfavorably, for BXPE to achieve above-average returns, one or a few of its investments must perform very well. There is no assurance that this will be the case.

## Key Risk Factors

BXPE is authorized and supervised by the Luxembourg supervisory authority, the Commission de Surveillance du Secteur Financier (the "CSSF"). Such authorization does not, however, imply approval by any Luxembourg authority of the contents of the Prospectus or of the portfolio of investments held by BXPE. Any representation to the contrary is unauthorized and unlawful.

The words "we", "us" and "our" refer to BXPE, together with its consolidated subsidiaries, including Blackstone Private Equity Strategies Fund SICAV ("BXPE Feeder SICAV", such term including, unless the context otherwise requires, its sub-funds, and together with its master fund, feeder funds, parallel funds and other related entities), unless the context requires otherwise. Financial information is approximate and as of December 31, 2024.

**Conflicts of Interest.** There may be occasions when BXPE's investment manager and its affiliates will encounter potential conflicts of interest in connection with BXPE's activities including, without limitation, the allocation of investment opportunities, relationships with Blackstone's and its affiliates' investment banking and advisory clients, and the diverse interests of BXPE's investor group. There can be no assurance that Blackstone will identify, mitigate, or resolve all conflicts of interest in a manner that is favorable to BXPE.

**Exchange Currency Risk.** Exchange Currency Risk. BXPE is denominated in U.S. dollars (USD). Shareholders holding Shares with a functional currency other than USD should acknowledge that they are exposed to fluctuations of the USD foreign exchange rate and/or hedging costs, which may lead to variations on the amount to be distributed, and all subscription payments and distributions, as well as returns, will be calculated and reported in the functional currency of the Class. This risk is not considered in the indicator shown above. Currency fluctuations and expenses related to hedging transactions may negatively impact the returns of BXPE as a whole. Each Class of Shares may differ in overall performance, and certain fees (including, but not limited to, the Management Fee, Performance Participation Allocation and AIFM and Administration Fee) will be calculated in the Reference Currency. BXPE will incur expenses in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

**Highly Competitive Market for Investment Opportunities.** The activity of identifying, completing and realizing attractive investments is highly competitive, and involves a high degree of uncertainty. There can be no assurance that BXPE will be able to locate, consummate and exit investments that satisfy its objectives or realize upon their values or that BXPE will be able to fully invest its available capital. There is no guarantee that investment opportunities will be allocated to BXPE and/or that the activities of Blackstone's other funds will not adversely affect the interests of BXPE.

**Lack of Liquidity.** There is no current public trading market for the shares, and Blackstone does not expect that such a market will ever develop. Therefore, repurchase of shares by BXPE will likely be the only way for you to dispose of your shares. BXPE expects to offer to repurchase shares at a price equal to the applicable net asset value as of the repurchase date and not based on the price at which you initially purchased your shares. Shares redeemed within two years of the date of issuance will be redeemed at 95% of the applicable net asset value as of the redemption date, unless such deduction is waived by BXPE in its discretion, including without limitation in case of redemptions resulting from death, qualifying disability or divorce. As a result, you may receive less than the price you paid for your shares when you sell them to BXPE pursuant to BXPE's share repurchase program.

The vast majority of BXPE's assets are expected to consist of private equity investments and other investments that cannot generally be readily liquidated without impacting BXPE's ability to realize full value upon their disposition. Therefore, BXPE may not always have a sufficient amount of cash to immediately satisfy redemption requests. As a result, your ability to have your shares redeemed by BXPE may be limited and at times you may not be able to liquidate your investment.

**No Assurance of Investment Return.** Prospective investors should be aware that an investment in BXPE is speculative and involves a high degree of risk. There can be no assurance that BXPE will achieve comparable results, implement its investment strategy, achieve its objectives or avoid substantial losses or that any expected returns will be met (or that the returns will be commensurate with the risks of investing in the type of transactions described herein).

The portfolio companies in which BXPE may invest (directly or indirectly) are speculative investments and will be subject to significant business and financial risks. BXPE's performance may be volatile. An investment should only be considered by eligible investors who can afford to lose all or a substantial amount of their investment. BXPE's fees and expenses may offset or exceed its profits.

**Recent Market Events Risk.** Local, regional, or global events such as war (e.g., Russia/Ukraine), acts of terrorism, public health issues like pandemics or epidemics (e.g., COVID-19), recession, or other economic, political and global macro factors and events could lead to a substantial economic downturn or recession in the U.S. and global economies and have a significant impact on the Fund and its investments. The recovery from such downturns is uncertain and may last for an extended period of time or result in significant volatility, and many of the risks discussed herein associated with an investment in the Fund may be increased.

---

## Key Risk Factors

**Reliance on Key Management Personnel.** The success of BXPE will depend, in large part, upon the skill and expertise of certain Blackstone professionals. In the event of the death, disability or departure of any key Blackstone professionals, the business and the performance of BXPE may be adversely affected. Some Blackstone professionals may have other responsibilities, including senior management responsibilities, throughout Blackstone and, therefore, conflicts are expected to arise in the allocation of such personnel's time (including as a result of such personnel deriving financial benefit from these other activities, including fees and performance-based compensation).

**Risk of Capital Loss and No Assurance of Investment Return.** BXPE offers no capital protection guarantee. This investment involves a significant risk of capital loss and should only be made if an investor can afford the loss of its entire investment. There are no guarantees or assurances regarding the achievement of investment objectives or performance. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose some or all of your investment. BXPE's performance may be volatile. An investment should only be considered by sophisticated investors who can afford to lose all or a substantial amount of their investment. BXPE's fees and expenses may offset or exceed its profits. In considering any investment performance information contained in this document and related materials ("the Materials"), recipients should bear in mind that past performance is not necessarily indicative of future results.

**Risks of Secondary Investing.** The funds managed by Strategic Partners (the "SP Funds") expect to invest primarily in third party – sponsored private investment funds ("Underlying Funds") and, indirectly, in investments selected by such unrelated sponsors. The interests in which the SP Funds seek to invest are highly illiquid and typically subject to significant restrictions on transfer, including a requirement for approval of the transfer by the general partner or the investment manager of the Underlying Funds. The SP Funds will not have an active role in the management of the Underlying Funds or their portfolio investments. The overall performance of the SP Funds will depend in large part on the acquisition price paid by the SP Funds for secondary investments and on the structure of the acquisitions. The performance of the SP Funds will be adversely affected in the event the valuations assumed by Strategic Partners in the course of negotiating acquisitions of investments prove to be too high. The activity of identifying and completing attractive secondary investments is highly competitive and involves a high degree of uncertainty. There can be no assurance that the SP Funds will be able to identify and complete investments which satisfy their rate of return objectives, or that they will be able to invest fully their committed

capital. In many cases, the SP Funds expect to have the opportunity to acquire portfolios of Underlying Funds from sellers on an 'all or nothing' basis. It may be more difficult for Strategic Partners to successfully value and close on investments being sold on such basis. In addition, the SP Funds may invest with third parties through joint ventures, structured transactions and similar arrangements. These arrangements may expose the SP Funds to risks associated with counterparties in addition to the risks associated with the Underlying Funds and their managers and portfolio companies.

**Sustainability Risks.** BXPE may be exposed to an environmental, social or governance event or condition that, could have a material adverse effect, actual or potential, on the value of the investments made by BXPE. Blackstone seeks to identify material sustainability risks as part of its investment process.

**Target Allocations.** There can be no assurance that a Fund will achieve its objectives or avoid substantial losses. Allocation strategies and targets depend on a variety of factors, including prevailing market conditions and investment availability. There is no guarantee that such strategies and targets will be achieved and any particular investment may not meet the target criteria.

**Use of Leverage.** The Fund may borrow money. If returns on such investment exceed the costs of borrowing, investor returns will be enhanced. However, if returns do not exceed the costs of borrowing, Fund performance will be depressed. This includes the potential for the Fund to suffer greater losses than it otherwise would have. The effect of leverage is that any losses will be magnified. The use of leverage also exposes the Fund to the risk of an increase in interest rates.

## Important Disclosure Information

This material is not to be reproduced or distributed to any other persons (other than professional advisors of the persons receiving this material) and is intended solely for the use of the persons to whom it has been delivered.

The sole purpose of this material is to inform, and it in no way is intended to attract any funds or deposits. Investments mentioned may not be appropriate for all investors. Any product discussed herein may be purchased only after an investor has carefully reviewed BXPE's prospectus and executed the subscription documents.

Alternative investments often are speculative, typically have higher fees than traditional investments, often include a high degree of risk and are appropriate only for eligible, long-term investors who are willing to forgo liquidity and put capital at risk for an indefinite period of time. They may be highly illiquid and can engage in leverage and other speculative practices that may increase volatility and risk of loss.

**Aggregated Returns.** The calculation of combined or composite net IRR/net returns takes the aggregate limited partner cash flows by actual date from inception of the strategy through the current quarter end and uses the terminal value (including unrealized investments) as of the current quarter end to comprise an overall return for the strategy. The actual realized returns on the unrealized investments used in this calculation may differ materially from the returns indicated herein. In addition, the actual returns of each Blackstone fund, account or investment vehicle included in such combined or composite returns may be higher or lower than the Aggregated Returns presented. Furthermore, no limited partner has necessarily achieved the combined or composite returns presented in such performance information, because a limited partner's participation in the applicable funds, accounts and/or investment vehicles may have varied. See "Performance Calculations" below.

**Blackstone Proprietary Data.** Certain information and data provided herein is based on Blackstone proprietary knowledge and data. Portfolio companies may provide proprietary market data to Blackstone, including about local market supply and demand conditions, current market rents and operating expenses, capital expenditures, and valuations for multiple assets. Such proprietary market data is used by Blackstone to evaluate market trends as well as to underwrite potential and existing investments. While Blackstone currently believes that such information is reliable for purposes used herein, it is subject to change, and reflects Blackstone's opinion as to whether the amount, nature and quality of the data is sufficient for the applicable conclusion, and no representations are made as to the accuracy or completeness thereof.

**Blended Private Equity Platform IRR.** Certain strategies and funds that BXPE may ultimately have exposure to are excluded from the calculation of the blended PE Platform net IRR as they are not part of Blackstone's Private Equity segment and/or were predecessor funds prior to a strategies existence at Blackstone. The funds included in the blended PE Platform net IRR are Blackstone's corporate private equity businesses, Tactical Opportunities vintages I-IV (inclusive of Commingled Funds, SMAs, and Co-Invests), Blackstone Growth vintage I, Strategic Partners LBO vintages I-IX, Strategic Partners Real Estate vintages I-VIII, Strategic Partners GP Stakes vintage I, Strategic Partners Infrastructure vintages I-III, Clarus vintage IV and Blackstone Life Sciences vintage V and Blackstone Life Sciences

Yield. The blended PE Platform net IRR excludes Clarus vintages I-III, Blackstone's General Partner Stakes vintages I-II, and Blackstone's Late-Stage Private Companies strategy.

The blended PE Platform net IRR was calculated by blending the aggregated net cash flows and unrealized values of the selected funds. Performance information presented includes information from a number of different Blackstone funds whose overall strategy and terms (including fees and expenses) may vary significantly from each other and, potentially, from those of BXPE. The investments were not managed as a single portfolio with coordinated guidelines, objectives and restrictions, and did not involve the same Blackstone professionals who will be involved in the management and operations of any future BXPE investments. Such performance is hypothetical, provided for informational purposes only, and does not represent the actual or estimated performance of BXPE or any other single fund, client or investor. Hypothetical performance has inherent limitations and prospective investors should not rely on any hypothetical performance shown herein.

**Case Studies.** The selected investment examples, case studies and/or transaction summaries presented or referred to herein may not be representative of all transactions of a given type or of investments generally and are intended to be illustrative of the types of investments that have been made or may be made by BXPE in employing its investment strategies. It should not be assumed that BXPE will make equally successful or comparable investments in the future. Moreover, the actual investments to be made by BXPE or any other future fund will be made under different market conditions from those investments presented or referenced in the Materials and may differ substantially from the investments presented herein as a result of various factors. Prospective investors should also note that the selected investment examples, case studies and/or transaction summaries presented or referred to herein have involved Blackstone professionals who will be involved with the management and operations of BXPE as well as other Blackstone personnel who will not be involved in the management and operations of BXPE. Certain investment examples described herein may be owned by investment vehicles managed by Blackstone and by certain other third-party equity partners, and in connection therewith Blackstone may own less than a majority of the equity securities of such investment. Further investment details are available upon request.

**Diversification; Potential Lack Thereof.** Diversification is not a guarantee of either a return or protection against loss in declining markets. The number of investments which BXPE makes may be limited, which would cause BXPE's investments to be more susceptible to fluctuations in value resulting from adverse economic or business conditions with respect thereto. There is assurance that any of BXPE's investments will perform well or even return capital; if certain investments perform unfavorably, for BXPE to achieve above-average returns, one or a few of its investments must perform very well. There is no assurance that this will be the case. In addition, certain geographic regions and/or industries in which BXPE is heavily invested may be more adversely affected from economic pressures when compared to other geographic regions and/or industries.

## Important Disclosure Information

**Embedded Growth.** Embedded growth represents Blackstone's expectations for growth based on its view of the current market environment taking into account rents that are currently below market rates and therefore have the potential to increase. These expectations are based on certain assumptions that may not be correct and on certain variables that may change, are presented for illustrative purposes only and do not constitute forecasts. There can be no assurance that any such results will actually be achieved.

**Forward-Looking.** Certain forward-looking statements, including financial projections and estimates and statements regarding future performance, are inherently uncertain and there may be important factors that could cause actual outcomes or results to differ materially from those indicated in such statements. Blackstone undertakes no obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise.

**Leverage; Borrowings Under a Subscription Facility.** A Fund may use leverage, and a Fund may utilize borrowings from Blackstone or under its subscription-based credit facility in advance of or in lieu of receiving investors' capital contributions. The use of leverage or borrowings magnifies investment, market and certain other risks and may be significant. A Fund's performance will be affected by the availability and terms of any leverage as such leverage will enhance returns from investments to the extent such returns exceed the costs of borrowings by such Fund. The leveraged capital structure of such assets will increase their exposure to certain factors such as rising interest rates, downturns in the economy, or deterioration in the financial condition of such assets or industry. In the event an investment cannot generate adequate cash flow to meet its debt service, a Fund may suffer a partial or total loss of capital invested in the investment, which may adversely affect the returns of such Fund. In the case of borrowings used in advance of or in lieu of receiving investors' capital contributions, such use will result in higher or lower reported returns than if investors' capital had been contributed at the inception of an investment because calculations of returns to investors are based on the payment date of investors' capital contributions. In addition, because a Fund will pay all expenses, including interest, associated with the use of leverage or borrowings, investors will indirectly bear such costs.

**Logos.** The logos presented herein were not selected based on performance of the applicable company or sponsor to which they pertain. Logos were selected to illustrate managers and/or portfolio companies that are indicative representations of the thesis, theme or trend discussed on the slide(s) where they appear. In Blackstone's opinion, the logos selected were generally the most applicable examples of the given thesis, theme or trend discussed on the relevant slide(s). All rights to the trademarks and/or logos presented herein belong to their respective owners and Blackstone's use hereof does not imply an affiliation with, or endorsement by, the owners of these logos.

**Master-Feeder Fund Structures.** A feeder fund will invest all or substantially all its assets in its master fund. A master-feeder fund structure is typically put in place for legal and commercial purposes. In general, investors will hold their interests at the level of the feeder fund and fund costs and expenses of the overall master-feeder structure will ultimately be borne by

investors on a pro-rated basis as applicable. For third party, non-Blackstone managed feeder funds investing into a Blackstone master fund, there may be additional costs that investors in those third party feeders incur from the relevant operator of those third party feeder funds. Therefore, in some instances, the performance of a feeder fund will differ to that of its master fund due to the additional costs that may have been incurred at feeder fund level

**No Benchmark.** BXPE is not managed in reference to any benchmark index

**Opinions.** Opinions expressed reflect the current opinions of Blackstone as of the date appearing in the Materials only and are based on Blackstone's opinions of the current market environment, which is subject to change. Certain information contained in the Materials discusses general market activity, industry or sector trends, or other broad-based economic, market or political conditions and should not be construed as research or investment advice.

**Performance Calculations.** Unless otherwise stated, all Internal Rate of Return ("IRR") and multiple on invested capital ("MOIC") calculations, as applicable, include realized and unrealized values and are presented on a "gross" basis (i.e., before management fees, organizational expenses, partnership-level expenses, the general partner's allocation of profit, taxes and other expenses borne by investors in such fund, which in the aggregate are expected to be substantial). Gross MOIC is determined by dividing (a) the amount realized/unrealized with respect to a fund's investments by (b) such fund's total invested amount and reflects a gross multiple of capital for all transactions. For individual investments, gross MOIC represents total realized and unrealized value divided by invested capital, taking into account purchase discounts, origination and other fees, deferred interest, and other similar items, as applicable. Gross Internal Rate of Return ("Gross IRR") is the annual implied discount rate that makes the net present value of all cash flows (the original investment, the interest, fees and expenses, the return of principal, or any other associated cash flows) from a particular investment equal to zero. The Gross IRR calculations for individual investments are annualized and made on the basis of the actual timing of investment inflows and outflows received or made by a fund. A series of cash flows is created starting with the initial cash capital contribution for the investment, followed by cash receipts (e.g., sale or current income proceeds). The terminal cash flow represents either the actual proceeds from the realization of the investment or, if the investment is unrealized, a fair market value ascribed to it by Blackstone, which is meant to approximate the cash flow that would have been generated had the investment been realized as of the end of the indicated period. The Gross IRR is based on a 365-day year and time-weights each cash flow based on the actual day invested or received, and in the case of unrealized investments, as if the investment were realized at the end of the indicated period. An IRR is a function of the length of time from the initial investment to ultimate realization or, in the case of an unrealized investment, a hypothetical realization. For a given dollar amount realized, the IRR will decrease as the investment holding period increases. Actual realized value of a fund's unrealized investments may differ materially from the values used to calculate the IRRs/MOICs reflected herein (see the discussions of "Realized and Unrealized Returns" and "Realized

---

## Important Disclosure Information

Losses" for additional information). Performance calculations may be shown as "-" or "NM" (if any) for unrealized investments held less than one year as small valuation changes over a short time period will tend to result in large IRRs/MOICs due to the nature of how IRRs/MOICs are calculated and likely do not reflect the ultimate realized returns that will be achieved by any such unrealized investments. Further information regarding performance calculations is available upon request. The Gross IRR calculation is computed on a levered basis, considering fund-level borrowings (made in lieu of or in advance of calling capital contributions). Net MOIC is determined by dividing (a) the sum of the amount distributed with respect to limited partners and the fair market value of all remaining investments, both net of realized and accrued carried interest by (b) a fund's total capital called from limited partners, including calls for investment funds, management fees and partnership expenses. Further information regarding net MOIC calculations is available upon request. Net IRR is calculated on a levered basis. Net IRR is based on returns after management and servicing fees, as applicable, organizational expenses, partnership expenses, certain fund tax liabilities and the general partner's carried interest (but before taxes or withholdings incurred by the limited partners directly or indirectly), and excludes certain non-fee and/or non-carry bearing parties, and adds back the effect of any tax distributions paid for carried interest already reflected in the returns.

Fund performance shown reflects a fund's return since inception and is based on the actual management fees and expenses paid by fund investors as a whole. The management fees paid by certain investors during the performance period are materially different from those paid by other investors during the performance period due to, among other factors, fee holidays for limited partners subscribing to a first close or fee breaks for investors committing at or above a specified capital amount. In addition, certain investors may pay investor servicing fees to the manager during the performance period.

Furthermore, fund performance shown may not reflect returns experienced by any particular investor in a fund since actual returns to investors depend on when each investor invested in such fund, which may be at a point in time subsequent to a Fund's equalization period (if applicable). Accordingly, performance for individual investors may vary from the performance stated herein as a result of the management fees paid by certain investors; the investor servicing fees paid by certain investors, as applicable; the timing of their investment; and/or their individual participation in fund investments.

**Tactical Opportunities.** The "Tac Opps Enterprise" is inclusive of commingled funds, parallel SMAs, co-investments, and all Tac Opps adjacencies, but excludes Blackstone Growth. The "Tac Opps Business" is inclusive of co-investments, commingled funds, SMAs, and certain Tac Opps adjacencies that were formed

as part of continuation vehicles for existing investments held in the commingled funds and parallel SMAs but excludes Blackstone Growth.

**Tax.** Investments mentioned herein may not be suitable for any or all recipients of this material, and potential investors are advised not to make any investment decision unless they have taken independent advice from an appropriately authorized advisor. An investment in BXPE may involve complex tax structures, which may result in delays in the distribution of important tax information and the requirement that investors obtain an extension on their income tax returns. Notwithstanding anything in this material to the contrary, to comply with U.S. Treasury Regulations Section 1.6011-4(b)(3) (i), each investor or prospective investor in BXPE (and any employee, representative or other agent of such investor or prospective investor) may disclose to any and all persons, without limitation of any kind, the U.S. federal, state or local income tax treatment and tax structure of BXPE or any transactions contemplated by this material, it being understood and agreed, for this purpose, (i) the name of, or any other identifying information regarding (A) BXPE or any existing or future investor (or any affiliate thereof) in BXPE, or (B) any investment or transaction entered into by BXPE, (ii) any performance information relating to BXPE or its investments, and (iii) any performance or other information relating to previous funds or investments sponsored by Blackstone, do not constitute such tax treatment or tax structure information.

**Third Party Information.** Certain information contained in the Materials has been obtained from sources outside Blackstone, which in certain cases have not been updated through the date hereof. While such information is believed to be reliable for purposes used herein, no representations are made as to the accuracy or completeness thereof and none of Blackstone, its funds, nor any of their affiliates takes any responsibility for, and has not independently verified, any such information.

**Trends.** There can be no assurances that any of the trends described herein will continue or will not reverse. Past events and trends do not imply, predict or guarantee, and are not necessarily indicative of, future events or results.
